

The Clean Services Foundation

Definition: Clean Services is THE solution to “clean up” information/data - for homes, businesses – anywhere/everywhere! Clean Services includes comprehensive and “fool-proof” technologies used to Monitor, Allow, Limit, Block or Report any digital information received. You allow what you want. You limit or block what you do NOT want. You choose what is appropriate and what is inappropriate for your site *and keep the improper, objectionable, violent, pornographic materials OUT!*

Partners: Companies/Groups working together to provide a fool-proof solution.

Clean Team: Supports and helps maintain Child-Safe Community Standards.

Now homeowners and business owners can decide and control what digital information comes into their site (*and monitor, report it all, and update choices, too, as desired*).
